Eclosion data

```
library(data.table)
library(ggplot2)
library(plyr)
```

Loading in the data

```
##grabbing data if git cloned
#eclosions<-fread("../Data/2018-01-26_rhagoletis_masterdata_data_slice.csv")
#grabbing from online
eclosions<-fread("https://raw.githubusercontent.com/adnguyen/Circadian_rhythm_runs_seasonal_timing/master/Data/2018-01-26_rhagoletis_masterdata_data_slice.csv")
## Warning in fread("https://raw.githubusercontent.com/adnguyen/Circadian_rhythm_runs_seasonal_timing/master/Data/2018-01-26_rhagoletis_masterdata_data_slice.csv"): Bumped column 41 to
## type character on data row 530, field contains 'change food 2017-10-31
## 21:50'. Coercing previously read values in this column from logical,
## integer or numeric back to character which may not be lossless; e.g., if
## '00' and '000' occurred before they will now be just '0', and there may
## be inconsistencies with treatment of ',', and ',NA,' too (if they occurred
## in this column before the bump). If this matters please rerun and set
## 'colClasses' to 'character' for this column. Please note that column type
## detection uses a sample of 1,000 rows (100 rows at 10 points) so hopefully
## this message should be very rare. If reporting to datatable-help, please
## rerun and include the output from verbose=TRUE.

plotting distributions with Ggplot

```
#histogram
```

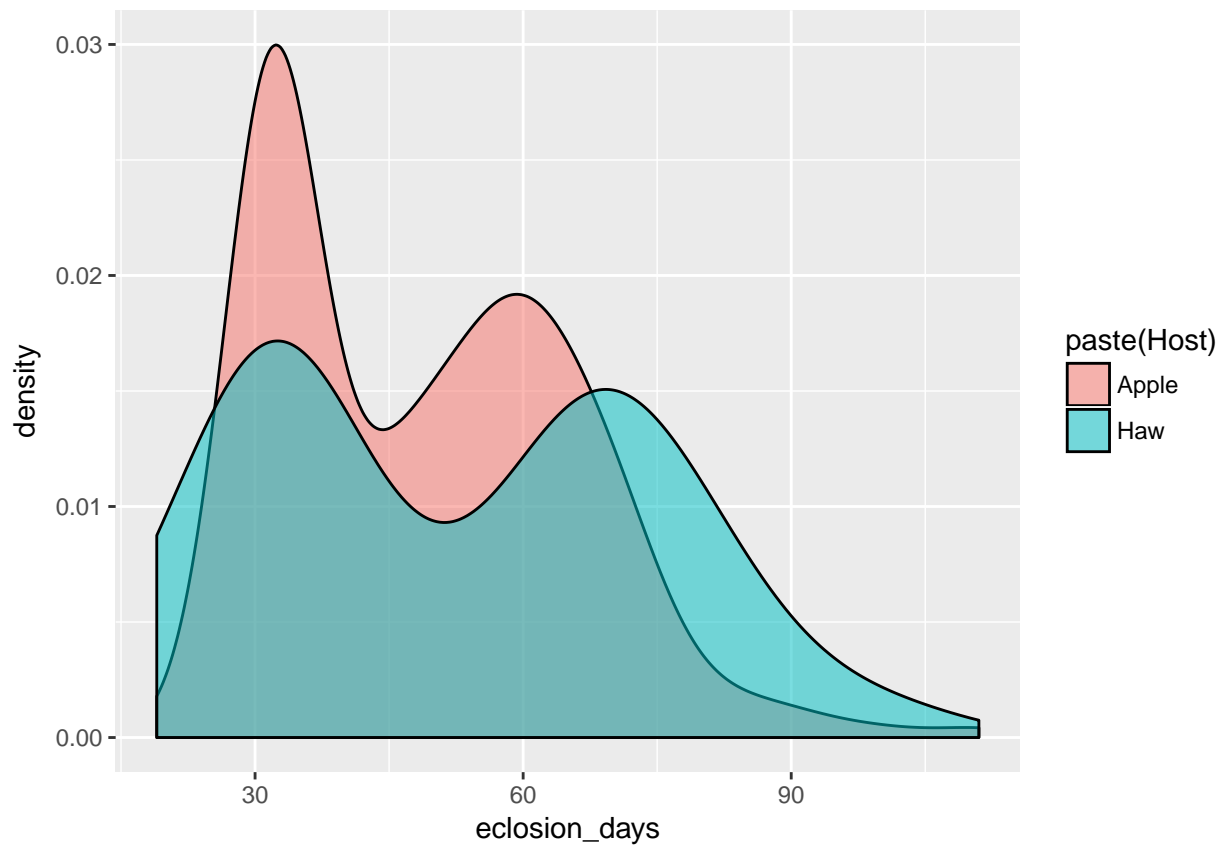

```
ggplot(eclosions,aes(x=eclosion_days,fill=paste(Host,organism)))+geom_histogram(position="identity",alpha=0.5)
```

```
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.
```

```
## Warning: Removed 1659 rows containing non-finite values (stat_bin).
```

```
#density of flies only
flies<-subset(eclosions,organism=="fly")
ggplot(flies,aes(x=eclosion_days,fill=paste(Host)))+geom_density(position="identity",alpha=.52)
## Warning: Removed 1 rows containing non-finite values (stat_density).
```

Skipped eclosion data

1. Load in the data from skipped cohorts

- Use this link: https://raw.githubusercontent.com/adnguyen/Circadian_rhythm_runs_seasonal_timing/master/Data/2017-10-22_skipped_apple_cohort_eclosions.csv

2. Plot (using ggplot) a histogram of eclosion_days

```
eclosions<-fread("https://raw.githubusercontent.com/adnguyen/Circadian_rhythm_runs_seasonal_timing/master/Data/2017-10-22_skipped_apple_cohort_eclosions.csv")
```
